The abovementioned risk assessment and internal control systems are designed to manage rather than eliminate the risk of failure to achieve business objectives, and can only provide reasonable and not absolute assurance against material misstatement or loss.

Internal Auditor

The Group has engaged an independent professional internal control consultant firm (the “Internal Control Consultant”) to review the entity level policies, risk assessment and internal control systems of major business processes of the Group for financial year ended 31st March 2023. The Internal Control Consultant performs the review, reports the relevant findings and recommendations to the Board and Audit Committee and follows up on management responses to the recommendations on an ongoing basis. Overall, the Board considers the risk management and internal control system of the Group are effective and adequate.

The Group does not have an internal audit department and the Board has reviewed the need for an internal audit function and considered that it more cost-effective to appoint external independent professionals to independently review and continuously evaluate the Group’s internal monitoring systems and risk management systems, taking into account the size and nature of the Board. The Board will review the need for an internal audit function at least annually.

According to the established plan approved by the Board, review of the risk management and internal control systems is conducted annually and the results are reported to the Board/Audit Committee afterwards.

During the year, the audit committee reviewed the effectiveness of the internal control system through the following processes and subsequently reported the review results to the Board:
